

FLEXERA SOFTWARE®

# Corporate Software Inspector

DATA SHEET

## Intelligent Security Patch Management

A remediation solution combining multi-platform assessment of patch status, tools for cost-effective security patching and seamless Microsoft System Center integration

### Benefits to

#### Your Organization:

##### Verified Intelligence

Verified, accurate and timely intelligence from Secunia Research enables you to prioritize remediation activities.

##### Software Scanning

Multi-platform scanning for accurate inventory of all software in your infrastructure and correlation with our vulnerability database for effective risk prioritization.

##### Reduced Patching Costs

Includes hundreds of preconfigured patches for easy deployment and covers 20,000+ programs – more non-Microsoft programs than anyone else.

##### Deployment Solutions

Corporate Software Inspector can be integrated with your preferred patch deployment solution. It also integrates seamlessly with Microsoft System Center and Microsoft Windows Server Update Services.

### Corporate Software Inspector

Corporate Software Inspector gives you the when, where, what and how of security patching. It tells you when a software vulnerability with an available patch is threatening your infrastructure, where it will have the most critical impact, what the right remediation strategy is and how to deploy it.

Secunia Research continuously verifies vulnerabilities and the effectiveness of the patches published by the vendors. This intelligence is then matched to your infrastructure, making it possible to prioritize, plan and execute workflows, and document your risk reduction efforts.

Corporate Software Inspector lets your team know what to patch for maximum impact and consistent risk reduction. You get complete visibility of your systems, stay current and reduce the cost of your patch process significantly.

### What is Corporate Software Inspector?

Corporate Software Inspector includes an authenticated internal software inventory scanner. It can assess the security patch status of more than 20,000 programs running on Windows, Apple Mac OSX and Red Hat Enterprise Linux (RHEL) platforms.

Corporate Software Inspector delivers patching, configuration tools and hundreds of pre-configured patches for non-Microsoft applications running on Windows platforms.

Corporate Software Inspector integrates with Personal Software Inspector for patch management of unmanaged PCs and laptops.

The seamless integration with Microsoft System Center and Windows Server Update Services for security patch management means you maximize your investment and manage patching of non-Microsoft products easily from within Microsoft System Center, using your existing infrastructure.

### Enables organizations to assess, prioritize and execute software vulnerability remediation to reduce risk

Software Vulnerability Management is critical to the security of organizations' infrastructures and assets. Corporate Software Inspector combines software vulnerability assessment and security patching to support the entire Software Vulnerability Management lifecycle.

### Secunia Research at Flexera Software

In September 2015, Flexera Software acquired Secunia, adding Secunia's Software Vulnerability Management solutions to complement Flexera Software's Software License Optimization and Application Readiness solutions. Under Flexera Software, Secunia Research continues to perform vulnerability verification, issue Secunia Advisories and publish data on the global vulnerability landscape.

Customers include:

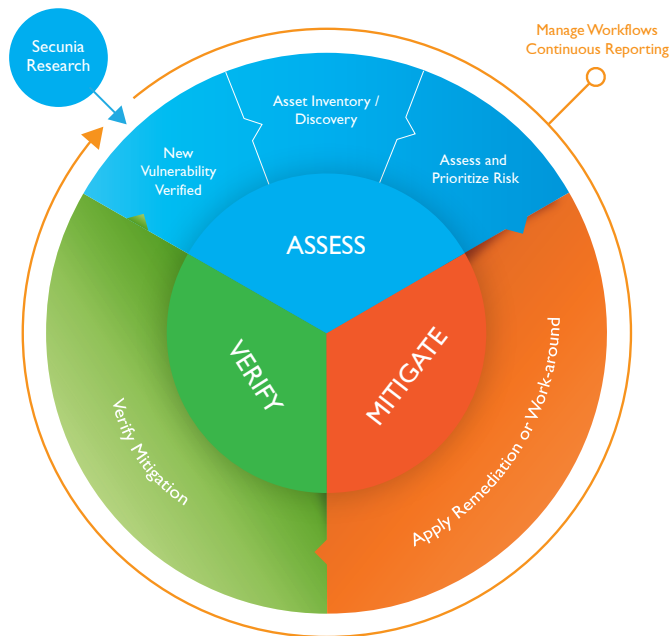

Figure 1: The Software Vulnerabilities Management lifecycle

### How Corporate Software Inspector supports the Software Vulnerability Management lifecycle

#### Assess:

- Vulnerability information is verified and described by Secunia Research
- Vulnerability Intelligence for applications running on desktops and servers is sent to our customers
- Non-intrusive, authenticated scan for complete software inventory
- Vulnerability Intelligence is correlated with your software inventory for assessment of patch status of over 20,000 applications
- Vulnerability Intelligence and correlation allow to risk assessment, decision making and distribution of tasks
- Delivers configuration tools for grouping and prioritizing assets according to various criteria

#### Mitigate:

- Delivers tested, pre-packaged, customizable patch content for hundreds of applications
- Delivers a packaging system for easy configuration of patches Integrates with your patch deployment solution for easy deployment

#### Verify

- Performs scans and delivers reports to track and document mitigation, and reassess the patch status of all applications in your environment

#### About Flexera Software

Flexera Software helps application producers and enterprises manage application usage and increase the value they derive from their software. Our next-generation software licensing, compliance, security and installation solutions are essential to ensure continuous licensing compliance, optimize software investments and future-proof businesses against the risks and costs of constantly changing technology. Over 80,000 customers turn to Flexera Software as a trusted and neutral source for the knowledge and expertise we have gained as the marketplace leader for over 25 years and for the automation and intelligence designed into our products.
